## Specific Absorption Rate (SAR)

This product is designed not to exceed the limits for exposure to radio waves recommended by international guidelines developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health. The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for wireless devices is 2 W/kg and the highest SAR value for this phone when tested complied with this limit.

The GDP-04 is in compliance with the basic restrictions as specified in the European Council Recommendation [1999 519 EC] for the measured GSM 850, GSM 900, GSM 1800 and GSM 1900 standards. The tests were performed according to the standard IEC 62209-2.

The maximum SAR value in body worn configuration is 0.239 W/kg.

Cinterion GSM module Declaration of Conformity is registered under the notified body number **CE 0682**.
